Experience

2020-12 - present
Contractual Software Developer
SlickRock Dev
Currently working over here as contractual basis. The company is a startup based on no code development and Server-less development.

2019-07 - 2020-11
Lead Frontend Developer
iServeu Technology
I diligently lead a team of awesome and motivated Frontend Devs. I also lead projects on financial domains using with GCP services such as cloud VM, cloud function, cloud run, cloud SQL, Big-query etc. My main frontend stack was mainly Angular and AngularJs. I also looked after Cloud flare Worker security to prevent unintended API access with HMAC SHA256 sign methods.

2019-01 - 2019-06
Angular developer
iServeu Technology
I Worked as Angularjs developer and I created and maintained my company's App's UI and other logical interface as It is used for financial solution for rural areas. I have pretty much worked on different types of payment system UI and created new Instances for different services like AEPS,Micro ATM etc.

- Secondary exam
- Grade- A (77.6%)

2018-06 -
present
Edwisor
course on full stack developer

Additional Activities

2015-12 -
2016-03
Project head
Power transmission of an IC engine through hydraulic circuit.
It was a project to utilize control system dynamics and hydraulic circuit with new type of piston-cylinder system in internal combustion engine mechanics. The main goal was to create a software based hydraulic circuit and cad design of the piston-cylinder system to create crank-shaft less engine. Software made design was successful. Due to the financial problem, prototype couldn't be built that time.

Opensource Enthusiast
1
I am a community Moderator of one of the biggest Facebook community of Nodejs called "NodeJS developers". I also like to create small libraries for nodejs or browser environment.

Certificates

2016-02 **Certificate of Appreciation on Social-business**

2015-02 **Certificate of completion of industrial training**

2019-07 LinkedIn Skill Assessment badge (Javascript)

Interests
